Business Analyst

LowestRates.ca is passionate about personal finance. A simple belief drives our team: that Canadians deserve to have choice when they make financial decisions. Our website offers that choice by providing consumers the ability to quickly and easily compare financial products like insurance, mortgages, credit cards and loans.

LowestRates.ca is a Toronto-based financial technology company that was founded in 2012 and is part of the MaRS FinTech cluster. We've received numerous awards and media features for our work in the FinTech space. We were recently ranked as the 11th fastest growing company in Canada in 2018 on Canadian Businesses' Growth 500 list and we were ranked 9th on Deloitte's Technology Fast 50 list in 2018 as well. We have also made PROFIT Magazine's Startup 50 list twice and our CEO was recognized by EY as one of Ontario's top entrepreneurs.

We're looking for self-starters who thrive in a fast-paced environment. This is an exciting full-time opportunity at our office in the heart of Toronto at Yonge and Davisville.

Job Summary

We are looking for a self-driven Business Analyst to join the LowestRates.ca team. The ideal candidate has property & casualty insurance experience and a proven ability to translate mountains of data into actionable, bite-sized information. Duties and responsibilities apply to existing and future application developments.

Specific Duties Include:

- Understanding how and why clients use the application and becoming a subject matter expert on application features and functionality
- Communicating with internal and/or external customers to analyze informational needs, functional requirements, and collaborating with the development team to design and implement solutions
- Soliciting requirements utilizing a variety of techniques including interviews, document analysis, surveys, business process descriptions, use cases, scenarios, and task/workflow analysis
- Designing, developing and executing quality assurance testing measures to validate business requirements
- Actively participating and collaborating in the planning of projects, product enhancements as well as maintenance releases, bug review and emergency changes for existing products
- Developing and maintaining documentation on all applications
