

## Object-Oriented Web Developer

LowestRates.ca is passionate about personal finance. A simple belief drives our team: that Canadians deserve to have choice when they make financial decisions. Our website offers that choice by providing consumers the ability to quickly and easily compare financial products like insurance, mortgages, credit cards and loans.

LowestRates.ca is a Toronto-based financial technology company that was founded in 2012, and is part of the MaRs FinTech cluster. We've received numerous awards and nominations for our work in the FinTech space, including appearing on PROFIT Magazine's Startup 50 list for the past two years and having our founder recognized by EY as one of Ontario's top entrepreneurs.

We're looking for self-starters who thrive in a fast-paced environment. This is an exciting full-time opportunity at our office in the heart of Toronto at Yonge+Davisville.

## Job Summary

We are seeking an Object-Oriented Web Developer with front and back-end skills and capabilities to join the team. In this position, you will play an integral role in the execution and success of the company's largest and most complex projects. This is a position which comes with a great deal of responsibility and creativity in which you will work on challenging projects within an exciting and fast paced environment. Communication skills, both verbal and written, are crucial.

In this important position, you will be directly influencing the quality of our products and constantly learning within this fast-growing company. You will be contributing to the development of a forward-thinking team and ensuring outstanding work is delivered.

## Specific Duties Include:

- Develop new, complex user interfaces utilizing native organic HTML, CSS and JavaScript (Plain JavaScript, not JQuery)
- Complete new, back-end integrations with multiple unique APIs using object-oriented programming (not procedural)
- Create new, back-end implementations using object-oriented designs
- Maintain and improve existing platforms
- Code beautiful front-end websites that will be seen and enjoyed by millions of people
- Code scalable APIs built to handle high volumes of requests
- Be involved in all stages of development, application/database design, coding, testing, and deployment
- Apply development standards and best practices and inspire the team with the excellence of your work

## The Successful Candidate

- Strong object-oriented programming skill is a must
- Strong database query and optimization skill is a must
- Strong knowledge of Java and/or PHP language
- Strong knowledge of raw JavaScript (not JQuery) is a must
- Strong communication skills and openness to constructive feedback is a must
- Working knowledge of the Java language

### **What's In It For You?**

- Very competitive compensation
- Growth opportunities
- Performance-based bonuses
- Health and wellness programs
- State-of-the-art systems and tools
- Collaborative work environment
- Casual dress code
- All-you-can-eat snacks and all-you-can-drink coffee!
- Paid social events
- Centrally located in midtown Toronto, on the subway line and close to restaurants and pubs

If you think you have what it takes to be successful in this role, please send your resume in confidence to [careers@lowestrates.ca](mailto:careers@lowestrates.ca). We thank all applicants, but only those candidates meeting the job requirements will be contacted.
